

## Help Take Over Maryland Board of Physicians **NOW**

Governor Larry Hogan, Jr. has promised he will radically change the **anti-life Maryland Board of Physicians** whose 22 members serve four-year staggered terms. Sixteen (16) of these positions are medically related. Of these, 12 are held by practicing physicians, one must be a practicing osteopath, two must be practicing physicians who teach at Maryland's two medical schools (Johns Hopkins and University of Maryland), and one must be a physician's assistant. The remaining six (6) are **consumer** members who need not have medical credentials, but one of whom must have hospital risk management or quality assurance experience.

Board members must be Maryland residents.

The Board meets once a month in Baltimore and there is communication between meetings, mostly by e-mail. **Thus, the time commitment to serve is not substantial!** Although these are not salaried positions, the state will reimburse you for your travel expenses incurred in connection with your membership.

An Executive Director for this board will also be needed. This position presently pays about \$111,000 per year. **This person need not be a physician.** But he or she must certainly have excellent leadership, person to person and administrative skills.

If you are interested in helping restore Respect for the Sanctity of Human Life and improving the reputation of Maryland medicine by serving on the Board of Physicians or serving as Executive Director, please contact **John Naughton** [NaughtonJJ@Gmail.com](mailto:NaughtonJJ@Gmail.com) 301-598-1638.

John will send you an application. Please fill it out including the **Appointee Exemption Disclosure Form**. Return your application, exemption form, and resume to John Naughton. He will review your application for completeness and accuracy and return it to you so you can send it directly to Governor Hogan's Appointment Office. This entire procedure should take you less than 30 minutes.

Please note that this procedure is slightly different than the one we sent you several weeks ago

If the Maryland Board of Physicians had been doing its job so as to protect patients, particularly abortion-minded women, many repeated egregious injuries and even at least one woman's death (**Jennifer Morbelli**) would not have occurred. The infamous Nebraska late trimester abortionist, **Leroy Carhart**, would not have received his **rubber stamped** license to practice his death dealing in Maryland. Why not? Simply because Carhart misstated his experience on his Maryland medical application.

Please forward this important information to others who may be interested in serving on the Maryland Board of Physicians.

I especially urge **YOU** to contact doctors whom you know are PRO-LIFE and encourage them to apply. They need not have ever been ACTIVE in our movement. But they certainly do need to be fearless,, outspoken, and uncompromising on Sanctity of Life issues. Remember to tell them that their **TIME**

**COMITTMENT WILL BE MINIMAL.**

I urge interested PRO-LIFERS like yourself to submit your application TODAY! Let us make the very most of this great **God-Given** opportunity!

**Long Live Christ Our King!**

**Jack Ames, Director, DEFEND LIFE**
